

CONTENT

MECHANICS AND MATERIALS SCIENCE

<i>P. Yasniy, V. Troshchenko, L. Khamaza.</i> Nonlocalized and localized fatigue damage In metals and alloys.....	7
I. Naumenko , <i>V. Limansky, R. Kravchuk.</i> Discontinuous failure and characteristic crack states.....	21
<i>A. Boyko, V. Valiashek, V. Kryven, A. Kaplun.</i> Development of plastic areas in angle points zone under concentrated force.....	34
<i>V. Meish, N. Kepenach.</i> Numerical solution of plane dynamic problems of the stiffened cylindrical shells elliptical cross – section theory under non-stationary load.....	44
<i>B. Protsyuk, O. Gorun.</i> The thermoelastic behavior of the infinite thermosensitive threelayer body under the action of a volumetric heat source.....	53
<i>A. Syasky, N. Shynkarchuk, V. Kot.</i> The stress state of piecewise homogeneous Isotropic plate with circular cut	63
<i>V. Revenko.</i> Determination of stress distribution in two interconnected rectangular plates.....	70
<i>I. Kuz', O. Kuz', N. Pyz.</i> Influence of stress concentrators onto stress-strain state of elasto-plastic plates	79
<i>M. Mazur, L. Poberezhny, L. Poberezhna.</i> Mathematical modelling of in-tube corrosion under gas hydrate.....	88
<i>O. Mel'nyk, O. Gutnichenko.</i> Investigation of the temperature coefficient resistance of graphite composite ceramic materials with different dispersion quartz.....	102

MANUFACTURING ENGINEERING AND AUTOMATED PROCESSES

<i>V. Loveikin, Y. Chovnyuk, A. Loveikin.</i> Application of the energy balance's method for the estimation of the energy dissipation in dynamic system's	115
<i>A. Gavrish, T. Roik, P. Kyrychok, S. Zygulya, V. Olyinik.</i> Surfaces quality of wear resistance composite friction parts of the printing machines at precision machining	126
<i>A. Schehorsky, M. Kravchenko, O. Kozakov, L. Polonsky.</i> Statistical method of finding quality indicators distribution of surfaces treated in thickness of gas-thermal coatings in various	135
<i>I. Barabash, L. Ksenshkevich.</i> Optimization of high-performance concrete mixes Using a mechanoactivated binder added with microsilica.....	148

**INSTRUMENT-MAKING
AND INFORMATION-MEASURING SYSTEMS**

<i>A. Yanenko.</i> Microwave radiometry in medico-biological applications.....	155
<i>M. Palamar, Y. Pasternak, A. Palamar.</i> Investigate of dynamic errors of precision system antenna control with asynchronous driver.....	164
<i>L. Kostyk, S. Potalitsyn.</i> Investigation of power efficiency of lighting devices for outdoor lighting with different light sources.....	173
<i>M. Strembitskyy.</i> Investigation of the learning algorithm efficiency of modified elman neural network.....	182
<i>A. Panchuk, V. Melnyk.</i> Cone penetrometer for reserching of ceramic mass reological properties.....	188

**MATHEMATICAL MODELING.
MATHEMATICS. PHYSICS**

<i>M. Petryk, E. Vorobiev, D. Mykhalyk.</i> Mathematical modeling of extraction process for biporous medium and analyze of pressure in particles and extraparticle space.....	195
<i>R. Zharovskiy, L. Scherbak.</i> Justification and research of the mathematical model of the seismic signal in correlation systems with the laguerre orthogonal filters	204
<i>V. Lyshuk, J. Selepyna.</i> Mathematical modeling of dynamic regimes of deep groove asynchronous motors.....	210
<i>V. Martsenyuk, Z. Mayhruk.</i> Qualitative analysis of hodgkin-huxley axon electrical activity based on classification rules.....	223
<i>M. Mykhailyshyn, O. Shabliy, O. Korol.</i> Mathematic modeling of the induction heating in recuperating of the operation characteristics of culinder-shape parts.....	233
