

сCONTENT

MECHANICS AND MATERIALS SCIENCE

<i>Yasniy P., Hlado V., Fedak S., Shulhan I.</i> Modeling of Al-6%Mg alloy creep at static and dynamic loading.....	7
<i>Śnieżek L.</i> Fatigue resistance, elements industrial pipeline with propagation semi-elliptical fatigue crack	13
<i>Mylnikov A.</i> Measuring of residual stress in of light guide fiber glass microzones by means of polarized-optical method	21
<i>Maruschak P., Yasniy O.</i> Damage tolerance analysis of continuous caster roll containing a circumferential semi-elliptical crack.....	27
<i>Dobrotvor I., Stukhlyak P., Zoloty R., Buketov A., Yacuk V., Rubaha V.</i> Geometrical sizes and structural parameters researches of external surface layers in filling epoxycomposites	34

MANUFACTURING ENGINEERING AND AUTOMATED PROCESSES

<i>Lutsiv I., Broshchak I.</i> Research of process of education and taking of shaving from cutting area at deep boring by drill with edgeadaptive connection.....	43
<i>Gavrysh A., Melnyk E.</i> Research of surface roughness at magnetically-abrasive treatment of details made of magnetically soft alloys	50
<i>Gevko B., Kochybunskya O., Dyachun A.</i> Calculation of clamping device machine-tools with the spiral corrugated elements.....	54
<i>Baranovsky V., Pankiv M., Ramsch V.</i> Improved combined working organ for excavation of root crops.....	61
<i>Kirichenko A., Lenchenko L., Zaika S.</i> Kinematical analysis of machine tool with two coordinate mechanism of parallel structure “bipode”	74
<i>Horodetsky I.</i> Peculiarities of the blank shaping technology of ceramic fan jet nozzles.....	80
<i>Zakalov O., Bortnyk A.</i> Research of process of grinding meat in a knives grinder of periodic action.....	85
<i>Komar R.</i> Calculation of dynamic loadings in the drive with protection-compensated clutch	91

INSTRUMENT-MAKING AND INFORMATION-MEASURING SYSTEMS

<i>Shyn O., Andriychuk V.</i> Spectrometry method of estimation of photosynthesis efficiency of light sources.....	97
<i>Kochan O.</i> Thermocouple based sensor.....	102

<i>Lupenko A., Natjaga V., Sysak I.</i> Single-stage electronic ballast with power factor corrector	108
<i>Sharyak V.</i> Methods of researches of descriptions of systems of models of database	116
<i>Palamar M.</i> Feature of information receiving of Earth remote sensing from low-orbital space vehicles.....	121

MATHEMATICS.

MATHEMATICAL MODELING. PHYSICS

<i>Lenyuk M., Shelestovsky B.</i> Calculation of the non-personal integrals according to the own elements of the Euler-Furier hybrid differential operator in $[0, R_2]$ segment of the polar axis.....	127
<i>Luchko J., Pelekh R.</i> Two-side methods for the solution nonlinear second kind Volterra integral equations	134
<i>Yakovenko V.</i> Mathematical model operation of bulk porous materials' heating-up by energy of a microwave electromagnetic field	141
<i>Shynhera N., Scherbak L.</i> Evaluation of standard welded framework resource by statistical methods	147
<i>Vyklyuk Ya.</i> Methodology of socio-economic processes prognostication by crystals fractal growth in fuzzy potential field methods	153
<i>Khvostivsky M.</i> The method of analysis of electroretinosignal is for early diagnostics of the state of retina of eye of man	162
<i>Sinchuk Y., Shynkarenko G.</i> A posteriori error estimator of fem approximation for convection-diffusion-reaction problem	169
<i>Didukh L., Skorenkyy Yu., Kramar O., Dovyhopaty Yu.</i> Correlation effects in narrow energy bands. I. Energy spectrum of modified form of polar model.....	175

CHEMISTRY. CHEMICAL, BIOLOGICAL AND FOOD TECHNOLOGYS

<i>Shynkaryk M., Voroshchuk V., Eresko G., Kymachynsky S.</i> Investigation power consumption in couple rotor-stator in rotor-vortex emulsifier by production compositions products on base curds	184
<i>Kuts V., Gorishna H., Martsiyash O.</i> Methods of calculation, design and tests of the experimental model of foamy deduster	190
