

CONTENT

Justyna Zygmuntowicz, Joanna Tańska, Paulina Wiecińska, Paulina Piotrkiewicz, Katarzyna Konopka, Mikołaj Szafran, Marcin Wachowski, Joanna Szymańska, Waldemar Kaszuwara. From ceramic core to metal rich surface: functionally graded Al ₂ O ₃ -Ni composites fabricated by centrifugal gel casting	4
Vladyslav Zhykhariev, Mariia Shapovalova, Oleksii Vodka, Serhii Misiura. Numerical study of the size effect and nucleation center concentration on the elastic properties of copper	20
Nadia Gashchyn, Sergii Glado, Nadia Kryva, Halyna Semenishyn. Maintaining the required temperature deformations of the viscoelastic disc	31
Daria Zavtrak, Valentyn Khychan, Yeva Dubanych, Bohdan Dobrotvor, Yaroslav Herasimchuk, Borys Bessarab, Artem Mandziy, Oleh Pastukh. Development of an intellectualized program system based on rag-architecture	37
Vyacheslav Nykytyuk, Andrii Dolinskyi. Application of large language models in generating Ukrainian corpora for training text classification systems	46
Yevhen Kovalenko, Sergiy Chernetskyi. Investigation of the influence of contact interaction conditions on the stress-strain state of an elastic bilayerbody	56
Taras Kramar, Oleksandr Kramar. A digital guide app for exhibitions: a case of Ternopil Regional Local Lore Museum	65
Mykola Pidgurskyi, Ivan Pidgurskyi, Denys Bykiv, Danylo Liubovitskyi, Yurii Rudyak. Analysis of the Stress-Strain State of Steel Solid-Web and Perforated I-Beams Used in Pitched Roof Structures	76
Mykola Kuz, Yaroslav Bezghachniuk, Taras Horodenko, Borys Nezamai, Andrii Oliinyk. Methods for quality assessment of standardized software time indicators	88
Tetiana Levytska, Liudmyla Kotykhova. Modeling of topological relationships between trends of social platforms X and YouTube for short-term forecasting using Telegram interface	99
Volodymyr Polishchuk, Vasyl Sehlianyk. A fuzzy framework for assessing the level of cognitive and operational readiness of regional citizens to ensure their own digital security	107
Ivan Peleshchak, Vasyl Lytvyn, Mykhailo Mykytyn, Roman Peleshchak. Recognition of Low-Probability-of-Intercept Radar Signals Based on a Hybrid CNN-MLP Model	119
Iaroslav Lytvynenko, Andrii Kondratiuk. Mathematical Models of Electrocardiosignals for the Task of Their Simulation, Taking into Account Various Types of Artifacts	130
Maria Pankiv, Yevheniya Martsenuk, Vasyl Fatiuk, Volodymyr Gogolyuk, Mykhailo Yushchysyn. Algorithm for developing a mechanical and technological model of cleaning systems for root harvesting machines	143
