

CONTENT

Ihor Kupchuk, Mykola Stadnik, Vitalii Yaropud. Investigation of Concrete Pavement Abrasion Resistance in Agro-Industrial Facilities Using Polystyrene Waste	4
Vitalii Antonchenko, Volodymyr Iasnii. Equivalent Axisymmetric 2D Modeling of Three-Dimensional Stress State	11
Ihor Artomov, Dmytro Krytskyi, Alina Artomova, Serhiy Popov, Artemii Artomov. Integrated frequency-based method for flight planning of stratospheric gliders with anomaly filtering	22
Valerii Zdorenko, Maksym Basaliuk. Water temperature measurement in an automated terrarium using a Pt1000 sensor	33
Ihor Boiko. Modal analysis of aircraft engine blisks	43
Vasiliy Kovbashyn, Igor Bochar. Technological features of cast iron treatment	54
Halyna Krechkovska. Features of the fracture of the control valve rod of a thermal power plant steam turbine	63
Taras Lypak, Halyna Lypak, Taras Kramar, Oleksij Duda. Strategies for LLM-Driven User Interface Generation in Smart Systems: A Comparative Analysis with Decision Guidance	70
Mykhaylo Petryk, Dmytro Mykhalyk, Mykola Zaiarnyi, Oleksiy Tsebriy, Mykola Shynkaryk. An extensible software architecture for modeling complex object-oriented multicomponent systems	84
Mykola Pidgurskyi, Ivan Pidgurskyi, Denys Bykiv, Ivan Zakharevych. Assessment of the Mutual Influence of Prefabricated Steel Silo Foundations Under Staged Loading	95
Grigorii Shymchuk, Iaroslav Lytvynenko. Comparative analysis of mathematical models and estimation of errors in computer modeling of the gas consumption process	107
Mykhailo Student, Alexander Luk'yanenko, Iryna Pohrelyuk, Khrystyna Zadorozhna, Oleksandra Student, Vasyl Trush, Volodymyr Hvozdetskyi. Comparison of tribological properties of VT6 titanium alloy surface after oxidation and nitriding	120
Andrii Yerii, Oleh Syniuk. Experimental study of the cavitation impregnation process of textile materials	130
Anastaciia Kutsenko, Mariia Bondar, Oleksii Kutsenko. Boundary Element Method in Structural Mechanics for Periodic Structure Vibration Protection	141
